5KGW

GENERATOR-WELDER

Here is design perfection coupled with selected quality materials and followed by unusual care in assembly, meticulous testing and inspection. Forney's design for power and welding is proved on each unit before shipment to you.

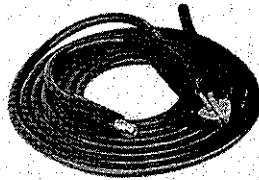

ACCESSORIES INCLUDED

WELDING MANUAL - 210 pages, profusely illustrated, and printed in lesson form.

ELECTRODE HOLDER - Heavy duty Forney Electrode Holder with 25' No. 2 Cable.

GROUND CLAMP - Forney Duo-Grip Ground Clamp with 20' No. 2 Cable.

WELDING HELMET - New, strong, lightweight fiber glass welding helmet with the famous Forney adjustable head band of soft, pliable plastic.

COMPACT PORTABLE POWER -

This Forney 5KGW unit is a compact, power-packed, portable Generator Welder. Use it for welding, brazing, soldering, heating for forming, hardfacing, cutting, pipe thawing. Also power for lighting, electrical appliances, power tools, etc.

COMPLETE WELDING RANGE -

The control panel provides nine combinations of heats on one throttle setting. With virtually an unlimited number of throttle settings and the nine heat stages you get a complete range of "heats" for any work or rod.

HANDLES PROBLEM RODS -

You'll like this wonderful new unit. It really handles problem rods. Its arc is soft and responsive. Arc blow in the normal sense is foreign to this machine.

LIGHTS AND POWER -

Power failures do happen! Why be in the dark! Just flip the switch on your Forney Model 5KGW, start the engine and you have 5000 watts of 60 cycle, single phase, alternating current.

110-220 VOLT CIRCUITS -

You get 110 and 220 volt circuits, too; with new designed grounded outlets on both circuits. They work for either the new or old style plugs on electric hand tools.

**ANOTHER TOP PRODUCT BY FORNEY
THE TOP NAME IN ARC WELDING**

SPECIFICATIONS

WELDER RATING -

Welding Range, 25-250 amps.
Rated Output, 200 amps.
Open Circuit Volts, 84
Duty Cycle at rated amps., 50%

AC POWER - Single Phase

Max. Watts, Intermittent duty, 7400
Watts, continuous duty @ 60 c 5000
2 Power Outlets, (polarized) 115 volts
Amperage Capacity 42
1 Power Outlet, 230 volts
(twist lock - three wire)
Amperage Capacity, 21

DIMENSIONS overall -

Length 41" - Width 21" - Height 36-1/2"

NET WEIGHT - Approximate, 650 lbs.

ENGINE - Wisconsin

Cycle, 4 - Model, THD
Fuel Capacity, gallons, 3.5
Piston Displacement, Cu. Ins. 53.9
H. P. at 1800 r.p.m. 11.7
H. P. at 2600 r.p.m. 16.4
Operating speed -
Welding, 2600 r.p.m.
60 Cycle power, 1800 r.p.m.
